

PROCEDURES TO ACCESS CORP DATA

DATE	VERSION	CHANGE DESCRIPTION
9/29/2022	001	Initial Version.

General Information

Following is an overview of the Corporations (Corp) procedures that are utilized to obtain Corp data from the Illinois Secretary of State's office.

The data is comprised of seven (7) different data sets for each record type (Master, Name, Agent, Annual Report, Assumed/Old Names, Stock and Other data). Each record type can be related by a unique file number. Each file will contain a header record indicating the date and Name of file, the format of which is 'RUN DATE = CCYYMMDD FILE:<File Name >' followed by filler of spaces. Each file will also contain a trailer record indicating the end of file and total number of records in the file, the format of which is 'END OF FILE RECORD COUNT= <Count>' followed by filler of spaces. The count is defined to be 7 digits long.

There will be one set of each of these 7 files generated at the time the job runs (Daily). Each of these files generated would contain all the records and not just the additional/changed records.

For every master record collected, all record types associated with the file number will be transmitted in their own specific data set.

The Master record types will be transmitted in fixed-length one hundred and sixty (160) character records. All fields therein, character or numeric, are in display format (i.e., no packed fields).

The Name record types will be transmitted in fixed-length one hundred and ninety-seven (197) character records.

The Agent record types will be transmitted in fixed-length one hundred and sixty-four (164) character records.

The Annual Report record types will be transmitted in fixed-length one hundred and twenty-six (126) character records.

The Assumed/Old Names record types will be transmitted in fixed-length two hundred and twenty-two (222) character records.

The Stock record types will be transmitted in fixed-length one hundred and one (101) character records.

The Other record types will be transmitted in fixed-length one hundred and nineteen (119) character records.

There will be only one (1) Master record for every file number. There will also be exactly one (1) Name, Agent, Annual Report and Other record per file number written to the Master data set. Multiple Assumed/Old Names and Stock records could be associated with each Master. It is also possible not to have any associated records, only a Master/Name/Agent/Annual Report/Other. The file number is unique; it is associated with only one Master record.

The Agent record contains the agent's name and address information. There is no associated state field as all agents must have/use an Illinois address.

CORPORATION “NGS” PROCESSING

The following information is required to create what the Corporations Division of Business Services calls a “NGS” (Not-In-Goodstanding) corporation. Basically, the intent of the routine is to display “NGS” on the corporation inquiry screen, even though the corporation has a status of goodstanding, or reinstated.

“NGS” will display on the corporation inquiry screen if all the following conditions are true:

- The current year Annual Report has been mailed to the corporation (i.e., CORP-CR-RUN-DATE > Zero)
- The corporation is in goodstanding (i.e., CORP-STATUS < 3)
- The current year Annual Report has not been paid (i.e., CORP-CR-PAID-DATE = Zero)
- The current month is equal to the incorporated month, or the current month is not equal to the two (2) months prior to the incorporated month. If CORP-EXTENDED-DATE = zero use CORP-INCORP-DATE otherwise use CORP-EXTENDED-DATE to determine incorporated month.

SECRETARY FIELD BREAKDOWN

On Statuses 04, 06, 07, 08, 09, 10 and 12, a literal with an associated Transaction date is entered in the Secretary’s name and address field. This literal will always appear in the first twenty-four (24) positions. The Transaction date will always begin in position twenty-five (25) and end in position thirty-two (32). The format for the Transaction date is a two (2) character month (mm), a one (1) character space, a two (2) character day (dd), a one (1) character space and a two (2) character year (yy).

If a corporation has been merged/consolidated, a surviving file number may be entered starting in position thirty-five (35). Positions thirty-three and thirty-four will contain spaces.

Following are the only entries presently in use:

POS 1	POS 25	POS 35
UNACCEPTABLE PAYMENT	mm dd yy	
WITHDRAWN	mm dd yy	
REVOKED	mm dd yy	
VOLUNTARY DISSOLUTION	mm dd yy	
INVOLUNTARY DISSOLUTION	mm dd yy
